

NEW MURABBA

Treatment by: Eli Sverdlov

MURABBA

THE SECRET

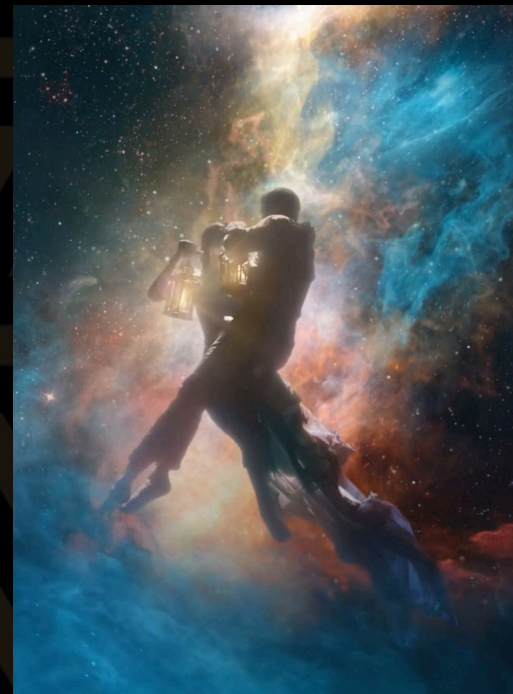

Our mission here today is to create a spectacular breathtaking movie which will attempt to reach the same level of overwhelming excitement that we have had the pleasure to experience when we were first exposed to this amazing project. This project is so spectacular and different from others, that it never ceases to surprise you. It gives me the same feeling as the suspense of a big, hidden secret waiting to be unearthed.

I imagine this project as an enormous fantastic dream but once you dive into it and discover more and more layers deeper within, you realize that you discover a dream within a dream within a dream. This continues infinitely with endless worlds, a whole universe... all folding into one huge cube... this is a place where you can easily lose your perspective and sense of dimension and drift easily into the unknown. All natural laws of physics change at once and the impossible becomes possible.

We are writing an exciting feature film, with a leading star, a famous Hollywood star. Christopher Nolan's movies like Inception and Interstellar are my references. I am writing a big epic action movie which will shrink into a couple of minutes length. This is why the way we tell the story and the editing will resemble a trailer to the movie we all must see.

INSPIRATION: EDITING AS A TRAILER

MURABBA
THE MOVIE

VO

What is the most precious element in the human brain?

An Idea.

A single idea from the human mind can build cities.

Our Hero is on a mission to reach and discover the hidden secret within the Murabba. The secret is encrypted within the dream which is hiding inside of another dream that lies within yet another dream and the way to reach this secret is to cross through different worlds and dimensions. In the movie our hero is passing through different amazing worlds in the hunt or mission to find out the secret. He penetrates the Murabba, the cube, and the world held inside it. Towards the cairn of stones in the center but inside this tower we discover another cube which hides another wall inside of it and this journey wages on in constant continuum.

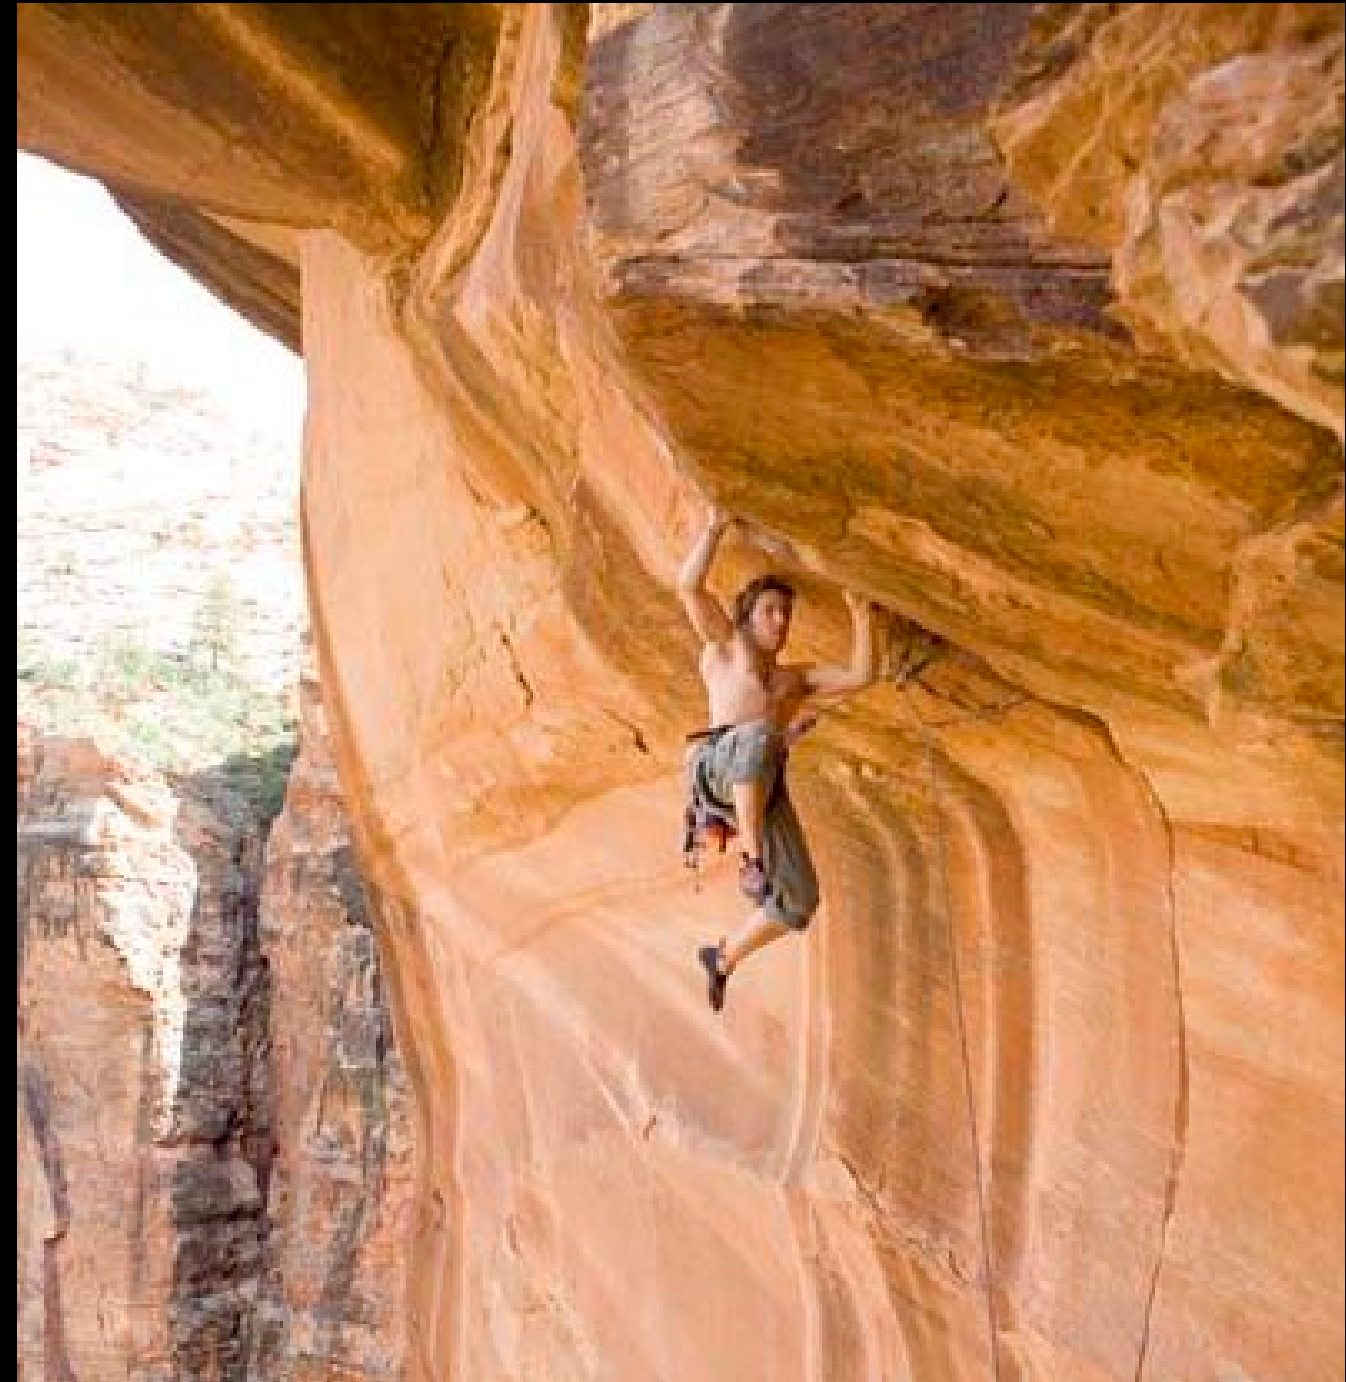

The movie starts as our hero awakens next to a spaceship wreck half covered in the sand, he reaches for his computer and connects himself and this action connects his brain and transports him into a dream in another dimension.

A scene from the movie Avatar showing a character on a floating island surrounded by a dense jungle and flying dragon birds. The character is on a small, rocky outcrop in the water, surrounded by a lush, green jungle with large, ancient-looking trees. Several large, colorful dragon birds are flying around the character. In the background, there are more floating islands and mountains under a blue sky with a large, crescent moon.

He finds himself hanging on a floating cliff (floating islands) surrounded by a big endless jungle (Avatar). Huge birds flying around, he jumps over and uses one of the dragon birds to fly him towards the cairn of stones.

He penetrates into a luxurious suite, all covered with gold, and discovers a beautiful golden cube like an ornament situated on a pedestal on a table. A young beautiful woman comes, holds the cube and hands it to him. He carefully draws it near and looks within with his eye close up through the ornament. He sees a whole new world inside.

VO

An idea that Transforms the world.
That can make them rewrite all the Rules...
Which is why...
We have to build it.
